

Voidfall Galactic Box upgraded components

The Galactic Box has some components that are upgraded compared to the Retail edition of the game. These upgrades are strictly quality of life and never affect the rules of the game in any way. Here you will find instructions for their assembly.

It's important to note that these components look different from their Retail edition counterparts. The instruction and figures will show the Retail version of these components in the Rulebook and Compendium. We'll explain the differences below, so you can always identify them easily.

MODULAR HOUSE BOARDS

A triple-layered House board is added to the game in each player color.

During setup, when you select a House mat, simply take the House board of your color as well, and slide the mat inside from the right.

This House board is functionally identical to the House mat that is slid inside it. Whenever the rules refer to a House mat, you should always consider the House board that you have assembled. The figures in the Rulebook will also show the mat and never the board.

FLEET TYPE MINIATURES

Plastic Fleet stands and Fleet type miniatures are replacing their cardboard Fleet token counterparts. There are 6 Fleet types that are replaced: the Corvette, Sentry, Destroyer, Carrier, Dreadnought, and Voidborn Fleet.

During setup, take the Fleet type miniatures, and place them on top of their Fleet stands. These together will have the same function as the cardboard Fleet tokens. Note that there are fewer stands than miniatures, and it is our intention that you assemble the miniatures as needed during your game session.

Whenever the rules refer to a Fleet token or a Fleet and the images show a flat cardboard component, always consider the assembled Fleet type miniatures and Fleet stands instead.

TECHNOLOGY TABLEAU AND AGENDA OFFER TRAYS

The Technology tableau and the Agenda offer can be arranged neatly into their separate trays, with the Agenda board fitting to be inserted in the middle of the Agenda offer tray as shown below. During gameplay, you might want to read and compare the available Technologies and Agendas. Instead of taking the cards one at a time in your hand to read, you can grab the entire tray.

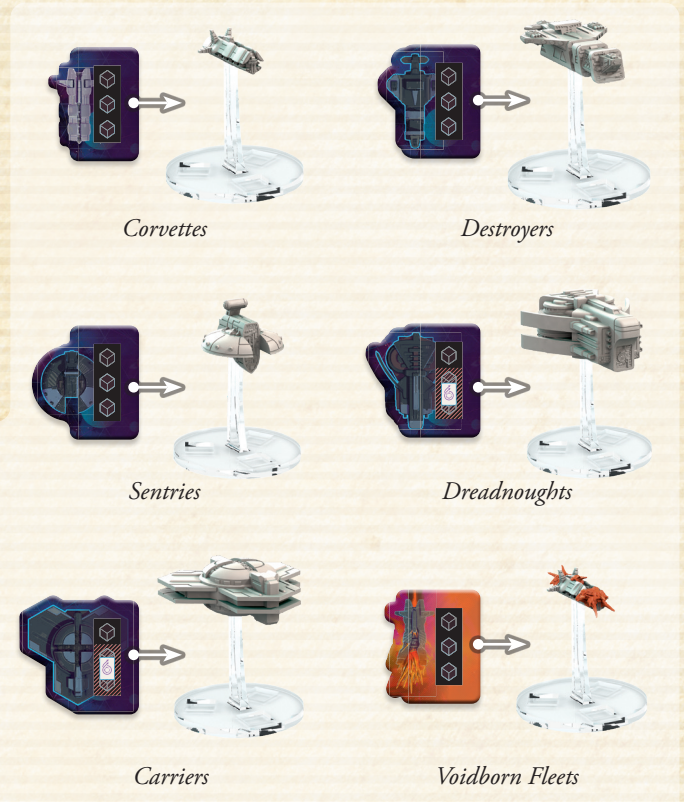

VOIDBORN MINIATURES AND METAL TOKENS

The cardboard Voidstorm and Harbinger tokens are replaced by miniatures in the Galactic Box. Whenever the rules refer to a Voidstorm token or Harbinger token and the images show a cardboard component, always instead consider the Voidstorm miniatures or Harbinger miniatures, respectively. The cardboard Trade Tokens and Turn Order markers are replaced with metal versions in the Galactic Box.

Harbingers

Voidstorms

Corvettes

Destroyers

Sentries

Dreadnoughts

Carriers

Voidborn Fleets
